Metrocity shopping center and residence/office complex is located in Levent, one of İstanbul's popular business center regions and has a total construction area of 208.000 m².

It is located just near the subway entrance and consists of 3 towers.

The client was seeking solutions for the vibration problems in the mechanical floors that continue along the 3 towers at the intermediate level.

For the first phase of the project ;

CDM-ISO-MACHINE-FLOAT system is applied for the construction of 12 floating floors and the HVAC system fans are installed by CDM-ISO-PHS and PHR systems. The project is still going on.
