

CDM-ISO-WH

Resilient Wall Tie

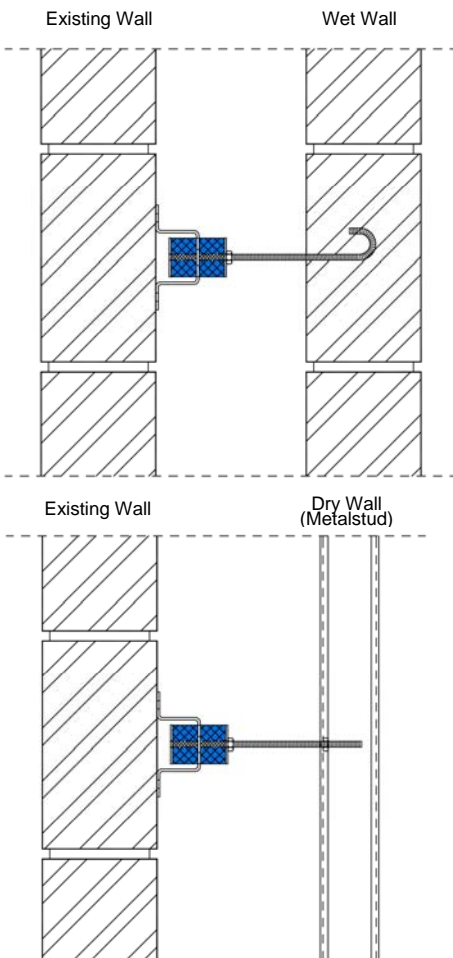

The **CDM-ISO-WH** resilient wall tie enables walls to be mechanically tied together without rigidly connecting them.

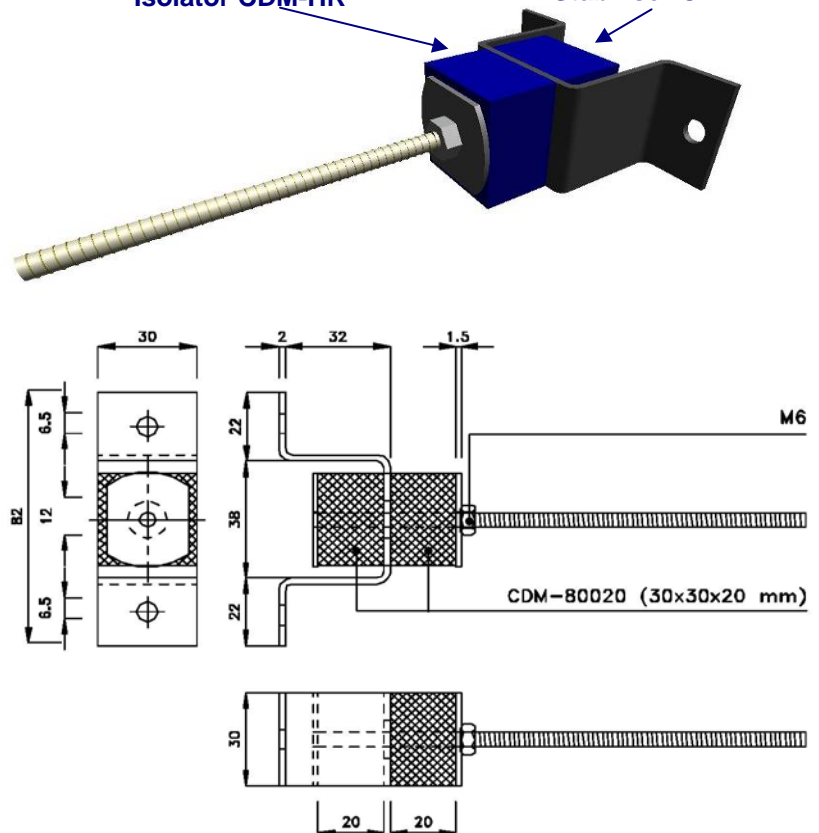

- Maximises sound insulation
- Available with straight rod for dry walls or with hook(s) for wet walls
- Easy to install
- All metal elements in stainless steel
- Min. void depth = 60mm

Available with a straight threaded rod for dry wall constructions and with a hook for wet wall constructions (total length = void + ½ thickness of wall). Wet wall tie is also available with 3 hooks so that it can be laid into the mortar of both walls.
