

CDM-ISO-PIPE

Isolator system for pipes

Pipes can often transmit noise and vibration to the supporting structures if they do not have the correct fixation. **CDM-ISO-PIPE** is a simple, tailor-made fixation system for pipes that minimises the amount of vibration and noise transmitted to the supporting structure.

Required data for design:

- Pipe contact temperature
- Pipe diameter and thickness
- Number of pipes to be isolated
- Nature and orientation of supporting surface
- Excitation frequency spectrum (if available)

The system is available for pipe diameters up to 100 mm, is extremely easy to install and can be used indoors and outdoors in any climate conditions.

THE SYSTEM IS A CUSTOMIZED DESIGN TO SUIT PROJECT SPECIFIC REQUIREMENTS AND CRITERIA
