

CDM-ISO-BOX-MARINE

Box-in-Box Systems

The 'Box-in-Box' concept is based on the complete de-coupling of floors, walls and ceilings from the boat structure thus giving maximum sound insulation and vibration isolation protection from other activities in the boat.

CDM-ISO-BOX-MARINE uses a combination of CDM-ISO-FLOORSTRIP-MARINE and CDM-ISO-T-MARINE, CDM-ISO-CC-MARINE and CDM-ISO-CORE-MARINE to create high-performance box-in-the-box systems. Airborne and structure-borne noise improvements of more than 30 dB can be achieved.
